TYTON[®] JOINT PIPE

3"-36"

McWane Ductile is a division of McWane, LLC

For Generations

TYTON® JOINT PIPE FROM MCWANE DUCTILE

Tyton Joint® pipe is manufactured by McWane Ductile in 3" to 36" diameters in standard and pressure classes.

The Tyton Joint was brought to market in the mid-1950s and has been modified periodically ever since. The Tyton Joint is the most widely used gasketing system for pipe in North America and around the world. McWane Ductile's Tyton Joint provides 5 degrees of deflection, allowing easy pipeline routing around obstacles

with a minimal amount of fittings. McWane Ductile offers Tyton Joint pipe with various lining options, including single and double thickness cement, Protecto 401 or bare. Exterior coating options include standard asphaltic paint, zinc or bare. Please contact your local sales representative for more information.

Note: If using Sure Stop 350® locking gaskets, please refer to the deflection limits for that product.

TYTON JOINT® ASSEMBLY INSTRUCTIONS

STEP 1. Thoroughly clean out the bell with special attention to the gasket recess. Remove any foreign material or excess paint. Clean the spigot or beveled plain end and remove any sharp edges with a standard file.

STEP 2. After making sure that the correct gasket is being used, insert it into the recess in the bell with the small end of the gasket facing the bell face.

STEP 3. Apply lubricant to the inside surface of the gasket, making sure that the entire surface is coated. Apply a generous coating of lubricant to the beveled portion of the plain end. **Note:** Use only lube as supplied and/or approved by the manufacturer. *Currently approved lubricants provided by McWane Ductile include Phoenix XL-27 and Black Swan.*

STEP 4. Guide the plain end into the bell, and while maintaining straight alignment, push the plain end into the bell socket. Once the joint is assembled, necessary deflection can be accomplished.
